How many devices can I use simultaneously?

We fight censorship with technology since 2011

We are an anti-censorship organization founded in 2011. Our work began with countering censorship in China — one of the most

AppleCensorship

Monitoring and exposing app

GoogleCensorship

Monitoring and exposing app censorship on major app stores.

closed countries in the world.

The Chinese authorities
recognize and block our
activities and have made
unsuccessful attempts to
disrupt them with
unprecedented cyberattacks.

Today we use our
accumulated experience and
implement innovative
projects to fight censorship
worldwide. Our work has
been referenced in hundreds
of [academic studies](#), and our
data is frequently cited in
[major news stories](#). Here are
some of our projects.

FreeBrowser

Our censorship-resistant
browser for accessing
blocked websites.

Blocky

Monitoring website
blocking in Mainland
China in real-time.

At GreatFireVPN, we prioritize your privacy, security
and speed. It makes us a trusted choice for secure
online access:

(TCF, MCF and Trancell)
which makes very heavy

sensorship on IP ranges
and most protocols, it
works like a charm.

Mehdi

I really like this app

because it's the only VPN
that works properly in

Turkmenistan.
